Clear Korean Keyboard Labels

Korean (Korea) Keyboard Stickers

Clear Korean Labels Description. The Korean keyboard labels are clear labels with Korean characters on the lower right corner or the right side. This allows you to convert any keyboard to a bilingual Korean keyboard. The labels are available in green (for light or beige colored keyboards) and white (for black keyboards).
Opaque Korean Keyboard Labels

Opaque Korean Labels Description. The opaque Korean keyboard labels are opaque black labels with white English US characters on the left and green Korean characters on the right side of the labels. This allows you to convert any keyboard to a bilingual English and Korean keyboard.

Compatibility

Language Compatibility. The Korean keyboard labels are compatible with the Windows keyboard use in the Republic of South Korea.

Windows Compatibility. The Korean keyboard labels are compatible with the Korean keyboard layout in Windows 8, 7, Vista, and XP. The labels might be compatible with other versions of Windows, but they have not been tested to ensure complete compatibility. Note: the Windows 8 Korean layout does not have the Won symbol (a W with a line through it denoting Korean currency). Except for the one character, the stickers are compatible with Windows 8.

Configuring Windows 8 for Korean

Instructions for a Touch Screen Windows 8.x
1. Swipe right to left on the screen and tap the Settings item.
2. Tap the Change PC settings item.
3. Tap or click on the Time and language item.
4. Tap or click the Region and language item.
5. Tap or click the Add a language item in the selector.
6. Scroll through the alphabetical list of languages until you find the Korean language.
7. Tap or click on the Korean language box.

Instructions for Non-Touch Screen Windows 8.x
1. Open the Control Panel by clicking on the File Explorer button in the lower left corner of the desktop. Click on the Desktop item under the Favorites section. Double click on the Control Panel icon to open the Control Panel.
2. Click on the Add a language item under the Clock, Language, and Region section.
3. Click on the Add a language item.
4. Languages are listed alphabetically. Scroll to the K section for Korean.
5. Click on the box for Korean.
6. Click the Add button to return to the installed language list window.
7. Close the Control Panel.

**Configuring Windows 7 and Vista for Korean**
1. Click on the Start button in the lower left corner of the computer screen.
2. Click on the Control Panel item.
3. Select the Clock, Language, and Region option.
4. Select the Regional and Language Option.
5. Click on the Keyboards and Languages Tab.
6. Click on the Change Keyboards button.
7. Click the Add button.
8. Find the Korean country item you wish to use.
9. Click on the plus sign ("+") to the left of the Korean entry.
10. Click on the plus sign ("+") to the left of the keyboard.
11. Click on the box to the left of the keyboard layout, Microsoft IME. Do not select the Korean keyboard.
12. Click the OK button to select the keyboard layout and close the Add Input Language dialog box.
13. Click on the Apply button in the lower right corner of the Text Services and Input Languages dialog box.
14. Click on the OK button in the lower right corner of the Text Services and Input Languages dialog box.
15. For Korean, you may be prompted to insert your Windows install disc to complete the keyboard installation. If so, place the Windows installation disc in the disc drive and answer the prompts in the dialog boxes to complete the installation. If you do not have a Windows installation disc, you should contact your computer manufacturer.

**Configuring Windows XP for Korean**
1. Click on the Start button in the lower left corner of the computer screen.
2. Click on the Control Panel item.
3. Click the Date, Time, Language, and Regional option.
4. Click the Other Languages option.
5. Make sure that you are viewing the Languages tab.
6. For Korean, click on the box to the left of the item, Install files for East Asian Languages. You may be prompted to insert your Microsoft Windows install disc at this point. If you do not have a Windows install disc for your computer, you should contact your computer manufacturer.
7. Click on the Details button.
8. In the Text Services and Input Languages dialog box, click on the Add button.
9. Scroll through the list of languages until you see the language and country you want. Note that many languages have multiple countries which may be different keyboard layouts. Make sure that the language and layout you select matches that of your language labels.
10. Click on the OK button to setup the language and close the language selector box.  
11. Click the Apply button in the lower right corner of the Text Services and Input Languages dialog box.  
12. Click the OK button to complete the language setup.  
13. Click OK to close all other dialog boxes that may be open.  

Configuring Microsoft Office for Korean  
If you are using Microsoft Office, you may need to configure it for the Korean keyboard.  
1. Begin by locating and selecting the Microsoft Office Tools in the main program menu.  
   Microsoft Office Language Settings  
2. If you are prompted for the Office installation disc, insert it and answer the prompts.  
3. In the Enabled Languages dialog box, click the boxes to the left of the languages you wish to use in Microsoft Office.  
4. When you have finished selecting the languages, click the Apply button.  
5. Click the OK button to close the Enabled Languages dialog box.  

Installing the Labels  
The language labels are arranged on a self-adhesive, die-cut sheet with six labels in each row. The labels are printed in the order of the keys of a standard keyboard. For example, whether you are using an English or a German keyboard, you start applying the labels at the upper left key and continue applying the labels to the right. There are certain exceptions to the layout depending upon the keyboard. For example, on some keyboards the "\" key appears on the second row from the top while others might place it on the third row from the top. You can use the illustration at the beginning of this document as a guide to placing the labels. (If you are using an US English keyboard, you can use the guide letters that appear under each keyboard label in the set.)  

Turn off the computer before you install the keyboard labels. It is not necessary to unplug the keyboard. If you are installing the labels on a desktop keyboard, check to ensure that the fold-out feet on the underside that hold the keyboard at an angle are folded in so they do not get broken when you are placing the labels.  

Before you begin installing the labels, you should clean the tops of the keyboard keys with a mild cleanser, such as a diluted detergent and water. Test the cleanser on one key to make sure that it does not
damage the key surface or the printing. Be careful to prevent any cleanser liquid from dripping down under the key into the key mechanism.

You should check the Windows keyboard layout (or your language software) before you install the labels. You can do this by configuring Windows for the language and then pressing each key on the keyboard to ensure that it matches the layout of the language labels (this is especially important for those language labels that include optional labels). When you are sure that the labels match the Windows keyboard layout, you can start installing the labels.

The easiest method to install the labels is to insert a small knife blade under the corner of the label and gently lift it from the sheet. Place the label gently on the correct keyboard key making sure that it is centered and properly aligned. When you have the label properly placed, press it down while removing the knife blade. When you are satisfied that the label is straight and on the correct key, use a rounded object, such as the rounded end of a plastic pen, to burnish (i.e., rub) the label firmly in place.

**Note:** once you place the keyboard label and burnish it in place, it cannot be moved to another key.

**How to Use the Keyboard Layout in Windows 8**

**Instructions for a Touch Screen Windows 8.x**
You must add the language keyboard to your Windows system before you can select the keyboard to use.
1. Tap or click on the keyboard icon in the taskbar.
2. When the virtual keyboard opens, click on the keyboard selector in the lower right corner of the virtual keyboard.
3. Select the Korean language from the list of language keyboards installed.
4. The virtual keyboard will display the Korean language layout. You can use the virtual keyboard to type in Korean or click on the "X" box to close the virtual keyboard and type in the hardware keyboard.

**Instructions for a Non-Touch Screen Windows 8.x**
1. Click on the Language selector in the lower right corner of the Taskbar. If the keyboard is in English, the selector will say ENG; if the selector is in Korean, it will Korean characters.
2. Select Korean to switch to the Korean keyboard layout.
3. To the left of the language selector is the IME selector. The IME selector will show "A" or a Korean character. If the IME indicator shows an A, the keyboard will type in English; if the IME indicator shows Korean characters, the keyboard will type in Korean.

**How to Use the Keyboard Layout in Windows 7, Vista, and XP**
After you setup the Korean keyboard in Windows, you can easily switch between Korean and the system language (i.e., the language of Windows in your computer). You switch languages using the keyboard selector located in the Task Bar at the bottom of the computer screen.
1. When you setup the Korean keyboard, you will see a language indicator on the Task Bar to the
right near the System Tray see the red arrow in the picture). For example, if you are typing
English, the language selector box will say "EN." If you are typing Korean, it will say "KO."
2. Open the application in which you wish to type.
3. Click inside the application. For example, if you wish to type in Microsoft Word, open the
Word and click inside the text edit area.
4. Left click on the language selector box to open the keyboard menu.
5. Click on the desired keyboard layout in the keyboard menu.
6. When you select the Korean IME in the Task Bar, you will see the
"KO" indicating the Korean keyboard, a glove and an English "A" or
a Korean character. Click on the "A" or the Korean character to go back and forth between
English and Korean.
7. When you have selected the desired language, you can start typing in the selected keyboard
language.
8. If you wish to return to the system language, click on the language selector box and select the
desired keyboard.

How to Type Korean Characters
There are no special instructions for typing in Korean in Windows. If the text entry is not correct,
you should contact your software manufacturer tech support.

Product Features
- The Korean keyboard labels are manufactured of highly durable Lexan® for high quality
  and long-lasting use.

- The Korean letters appear on the right side of the clear label allowing you to create a
  bilingual keyboard.

- Select the Korean letter color, green or white, to best suit your keyboard color. We
  recommend green letters for beige and light colored keyboards and white letters for black
  or dark colored keyboards.

- The letters are printed on the underside of the label making it almost impossible to
  scratch or wear off.

- The labels are self-adhesive for peel-and-stick installation.

- The adhesive will not harm the original printing on the keyboard keys.

- If desired, the labels may be removed without damaging the keyboard.

- The Korean labels are designed to fit standard PC computer keyboards. If necessary, the
  labels can be trimmed with scissors prior to installation.
